

Divine Chemicals Company
Innovating Chemistry

Dyfill:

Drum Filler; Imparts excellent uniformity throughout the leather, together with filling action, it imparts very good fullness, roundness, a tight break and soft handle, soft silky feel, uniform look, good buffing properties and improved finishing.

Drum Protein Filler

Product	Base	Appearance	Total Solids %	pH / Charge	Uses / Benefits
Dyfill PF	High quality Protein based filler	Pale brown powder	95 ± 2	5.5-7.5 / Anionic	Dyfill PF imparts excellent uniformity throughout the leather, together with filling action it imparts very good fullness, roundness, a tight break and soft handle. Dyfill PF is reactive protein filler for use on softer tannages including garment leather. It imparts soft fullness, good roundness, tight break and soft silky feel, uniform look, good buffing properties and improved finishing. Dyfill PF can be used for almost all type of leather, chrome tanned, vegetable tanned and combination tanned, either full grain or corrected grain leathers. The best way to apply Dyfill PF is to convert the powder to slurry by adding water and mixing well and add to the skin and run for 20 minutes. Before the addition of fatliquor. Dyfill PF imparts maximum filling in the loosest part of the leather i.e. belly and flank area ensuring tight grain. It can be added as dry powder. It can be used 2 to 4 % depending on type of leather produced and result desired.
Dyfill LF	High Quality Protein based filler	Pale brown powder	95 ± 2	5.5-7.5 / Anionic	Dyfill LF is protein type filler for use on softer & firmer tannages including garment leather. It imparts softness, fullness, good roundness, tight break and soft silky feel, uniform look, good buffing properties and improved finishing. Dyfill LF can be used for almost all type of leather, chrome tanned, vegetable tanned and combination tanned, either full grain or corrected grain leathers. Dyfill LF imparts excellent uniformity throughout the leather, together with filling action it imparts very good fullness, roundness, a tight break and soft handle. The best way to apply Dyfill LF is to convert the powder to slurry by adding water and mixing well and add to the skin and run for 20 minutes. Before the addition of fatliquor. Dyfill LF imparts maximum filling in the loosest part of the leather i.e. belly and flank area ensuring tight grain. It can be added as dry powder. It can be used 2 to 4 % depending on type of leather to be produced.
Dyfill	Protein	Pale brown	95 ± 2	5.5-7.5 /	Dyfill LFS is protein type filler for use on softer tannages

LFS	based filler	powder		Anionic	including garment leather. It imparts softness, fullness, good roundness, tight break and soft silky feel, uniform look, good buffing properties and improved finishing. Dyfill LFS can be used for almost all type of leather, chrome tanned, vegetable tanned and combination tanned, either full grain of corrected grain leathers. Dyfill LFS imparts excellent uniformity throughout the leather, together with filling action it imparts very good fullness, roundness, a tight break and soft handle. The best way to apply Dyfill LFS is to convert the powder to slurry by adding water and mixing well and add to the skin and run for 20 minutes. Before the addition of fatliquor. Dyfill LFS imparts maximum filling in the loosest part of the leather i.e. belly and flank area ensuring tight grain. It can be added as dry powder. It can be used 2 to 5 % depending on type of leather to be produced.
Dyfill LFC	Protein based filler	Pale brown powder	95 ± 2	5.5-7.5 / Anionic	Dyfill LFC is protein type filler for use on softer tannages including garment leather. It imparts softness, fullness, good roundness, tight break and soft silky feel, uniform look, good buffing properties and improved finishing. Dyfill LFC can be used for almost all type of leather, chrome tanned, vegetable tanned and combination tanned, either full grain of corrected grain leathers. Dyfill LFC imparts excellent uniformity throughout the leather, together with filling action it imparts very good fullness, roundness, a tight break and soft handle. The best way to apply Dyfill LFC is to convert the powder to slurry by adding water and mixing well and add to the skin and run for 20 minutes. Before the addition of fatliquor. Dyfill LFC imparts maximum filling in the loosest part of the leather i.e. belly and flank area ensuring tight grain. It can be added as dry powder. It can be used 2 to 6 % depending on type of leather to be produced.

Dyisol, Dytan, Dycotan, Dycryltan, Dysyntan, Dyfill, Dyifix, Dyimol, Dyisoft, Dyipol, Dyilix and Dyauxl are Trade Mark and Brand Names of Divine Chemicals Company

Divine Chemicals Company manufactures all products under carefully controlled conditions to meet rigid specifications. They are offered without obligation and warranty. The values given in this publication are typical values intended as guidelines for the use of the products. They are not specifications. If you require the actual specifications currently in force on the specific products, contact your Divine Chemicals Company representative for the appropriate information
